Letter of Recommendation for Suncon, Inc.

To Whom It May Concern,

It gives me great pleasure to recommend Suncon Inc. They recently completed a commercial interior renovation for a 45K sq.ft. major national retail tenant in a shopping center managed by my company, Stiles Corporation. This was Stiles' first experience with Suncon, and it certainly won't be our last. Starting with the preliminary budget process all the way through design, permitting, construction and final inspections, Suncon proved themselves to be a valued and trusted partner at every step. They are reliable, experienced, conscientious, and well-staffed. They took a lot of guesswork out of the project and instinctively solved problems along the way, frequently before Stiles even knew there was a problem. They are also fair and competitive in their bidding. Their cost estimates and summaries are clear and easily understood. It has been truly refreshing to work with them especially over the past two years during the pandemic when good general contractors have been in short supply.

I especially acknowledge and recognize the solid efforts of Tim Majors, Roger Reeder, Joey Parr, Michael Lehman and Joacie Gonzalez... such an amazing team of professionals! They have always made themselves immediately available to address issues as they arise, and they are instrumental in resolving the issues to our satisfaction. They answer all questions thoroughly and have never made us feel as if we're lacking information. They are definitely problem solvers.

I would be very happy to accept your call or email to further discuss Stiles' experience with Suncon. We are very much looking forward to working with them on another project.

Kind Regards,

Anthony Valdez, Senior Project Manager
Stiles Corporation
